

Permitted Use Policy Amendment (aka “phase out”)

December 20, 2010

Cette publication hautement spécialisée Ontario Parks Permitted Use Policy Amendment n'est disponible qu'en anglais conformément au Règlement 671/92, selon lequel il n'est pas obligatoire de la traduire en vertu de la Loi sur les services en français. Pour obtenir des renseignements en français, veuillez communiquer avec le ministère de l'Environnement, de la Protection de la nature et des Parcs au prc.ontarioparks@ontario.ca

Purpose of Amendment

This amendment provides direction for certain permitted uses in some parks (aka “phase out”). The amendment (Table 1) amends policy in *Ontario Provincial Parks: Planning and Management Policies* (1992) and *Ontario’s Living Legacy Land Use Strategy* (1999) as a result of policy changes approved on December 20, 2010.

Background to Amendment

Phase out policy was established in 1989. It set a deadline to phase out certain activities in some parks within a 21 year period (i.e. December 31, 2009). The activities are private tenure (e.g. recreation camps and agriculture, but not including cottage leases in Rondeau and Algonquin provincial parks), and commercial harvesting (e.g. trapping, bait harvesting, commercial fishing and wild rice harvesting). Changes to the policy were approved in December 2010 following consultation on a proposal to grant a lifetime extension. There are no commercial fishing and wild rice harvesting affected by the policy.

The proposed changes were available for comment from November 2 until December 14, 2009. Consultation included notification through a policy proposal posting on the Environmental Registry, a background information document posted on the Ontario Parks website and a broad mail-out. A total of 132 submissions were received and input was mixed. Some respondents expressed support, many stating that the lifetime extension does not go far enough (i.e. activities should be permitted to continue indefinitely). Some respondents expressed opposition to the lifetime extension, many stating that the activities are incompatible with protected areas legislation and the principle of ecological integrity, and that the rationale for changing the policy was not evident. There was also criticism for waiting until the end of 2009 to initiate consultation. Not all responses were unique. Minor changes were made to the policy, generally to provide clarity.

The following table (Table 1: Consolidated “2010 Phase Out” Park Policy) is the approved policy direction and amends direction in *Ontario Provincial Parks: Planning and Management Policies* (1992 Update) and *Ontario’s Living Legacy Land Use Strategy* (1999). The amendment should be read as a supplement or insert to the planning and management policies document and the strategy.

Table 1: Consolidated “2010 Phase Out” Park Policy

Amendments to park policy for private tenure (private recreation camps and agriculture) and commercial harvesting (trapping, bait harvesting and commercial fishing) in certain parks (aka phase out) were approved on December 20, 2010. Changes included a lifetime extension for licence/permit holders due to expire by 2010, with some exceptions. Under this policy, the lifetime extension applies to the permit/licence holder on October 30, 2009 for as long as that person is alive. Where there is concern for park values or ecological integrity opportunities to mitigate potential impacts will be explored. Transfers are not permitted.

MANAGEMENT THEME Use/Activity	PERMITTED Y=yes N=no M=maybe	POLICY		
		Parks Outside the OLL Planning Area (Existing Park Policy)	Pre-OLL Parks Inside the OLL Planning Area	Post-OLL Parks or Park Additions Inside the OLL Planning Area
FISHERIES				
Commercial fishing (existing)	M	Commercial fishing will not be permitted within provincial parks, except in waterway parks (where supported in the park management plan) and in lakes not wholly enclosed within a park's boundary.	Existing use permitted to continue indefinitely.	
Commercial bait harvest (existing)	M	Commercial bait harvesting will not be permitted within provincial parks, except in waterway parks (where supported in the park management plan) and in lakes not wholly enclosed within a park's boundary.	Existing use permitted to continue indefinitely except in nature reserve and wilderness class parks and zones.	Existing use permitted to continue indefinitely except in nature reserve class parks.
		Existing ¹ licensed operations in park-encompassed waters may be extended annually, for the lifetime of the current licensee or until the licence is surrendered—whichever occurs first. Annual extensions are conditional on the outcome of a policy review of bait use and bait harvesting in protected areas.	In nature reserve and wilderness class parks and zones, existing ¹ licensed operations in park-encompassed waters may be extended annually, for the lifetime of the current licensee or until the licence is surrendered—whichever occurs first, (except for except for Aboriginal use, subject to applicable legislation and regulation). Annual extensions are conditional on the outcome of a policy review of bait use and bait harvesting in protected areas.	In nature reserve class parks, existing ¹ licensed operations in park-encompassed waters may be extended annually, for the lifetime of the current licensee or until the licence is surrendered—whichever occurs first. Annual extensions are conditional on the outcome of a policy review of bait use and bait harvesting in protected areas.
		Owners of tourist operations in wilderness class parks are permitted by licence to bait fish in designated water bodies within the park, but only for use in the park.
